SMART BRAINS INDIA

End to end digital presence for a brain training academy

Adding structure to conversations, without breaking them. Solo designer and developer. Real clients. Measurable growth. From zero to a functioning brand online.

01 — PROJECT OVERVIEW

From invisible to credible

Smart Brains India is a brain training academy offering programs in abacus, vedic maths, phonics, and handwriting for children. Despite having a strong in-person reputation, the academy had no digital presence — no website, no way for interested parents to explore programs or inquire online, and no means of reaching families outside their immediate locality.

I took ownership of the entire digital journey — from understanding the business goals and user needs, to designing the experience, building it in Next.js with AI assistance, and deploying it with SEO and GEO optimizations. This was a ground-up project with real stakes: real clients, a real business, and a real family depending on the outcome.

35%

Digital Presence Growth

Multi-city

Clients After Launch

Pages, Fully Designed & Built

02 — PROBLEM STATEMENT

The real problem wasn't just "No Website".

The deeper problem was trust. Brain training programs are abstract — parents can't see the results upfront. They're skeptical. Competitors existed online, but their websites were cluttered, vague, and most are spiritually-worded. no real curriculum, no scientific backing, no transparency. Parents had no way to evaluate what they were signing their child up for.

WHAT COMPETITORS DID

Vague, spiritual-sounding language

WHAT WE DID DIFFERENTLY

Scientific, evidence-based framing

No curriculum details

No interactive experience

No proof of what happens in class

Dumped all info in a wall of text

Full curriculum exposed per program

Interactive program experiences

Real student testimonials shown

Transparent, structured content

"Parents don't buy programs. They buy confidence that the program will work for their child. Our job was to build that confidence before they picked up the phone."

03 — MY ROLE

One person. The full product lifecycle.

Smart Brains India is a brain training academy offering programs in abacus, vedic maths, phonics, and handwriting for children.

04 — DESIGN PROCESS

How I approached it

The central design insight driving every decision: parents trust what they can experience, not what they read. That single principle led to the interactive program features that set this website apart from every competitor.

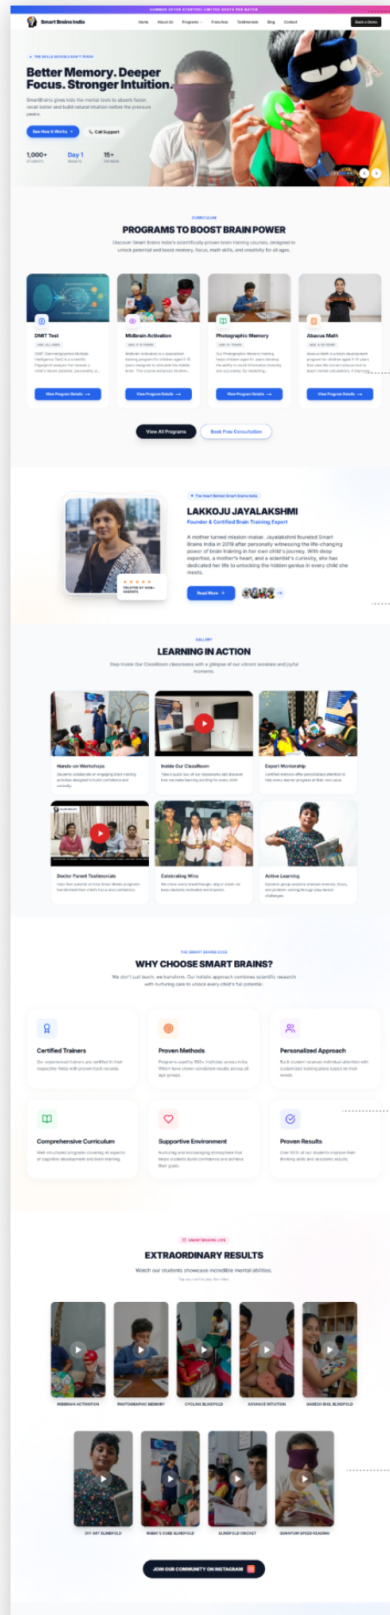

05 — KEY PAGES & DESIGN DECISIONS

Every page had a job to do

HOME PAGE

Designed as a Trust-focused landing experience with clear program highlights and strong CTAs. The visual hierarchy quickly explains Smart Brains while warm colors and child-focused imagery create a friendly, professional feel.

Hero Sticky banner — urgency hook Above the fold
Full-width top sticky strip announces Banner the summer batch

Instant Free Demo popup — Low friction
A Pop Up of Free Demo. Removes every excuse not to enquire.

SPECIAL OFFER

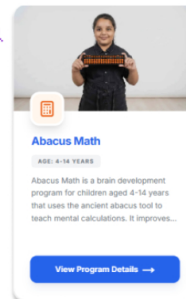

Unlock Your Child's Pure Potential

Join 1,000+ students in our expert-led brain training programs. Fill the form below to get a **FREE Demo Session**.

☐ Interested in Free Demo

GET FREE DEMO NOW

We respect your privacy. No spam, only helpful information about your child's development.

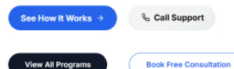

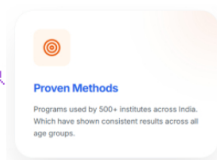

Program cards with images — Visual browse
Each program gets its own image card + 'View Program Details' CTA. Scan, click, convert.

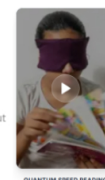

Founder spotlight section — Authority builder
Dedicated section for founder Lakkoju Jayalakshmi photo, credentials, story snippet, and star rating. Puts a real human face to the brand instantly.

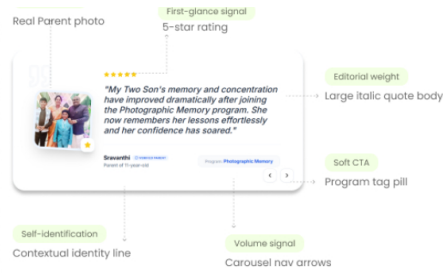

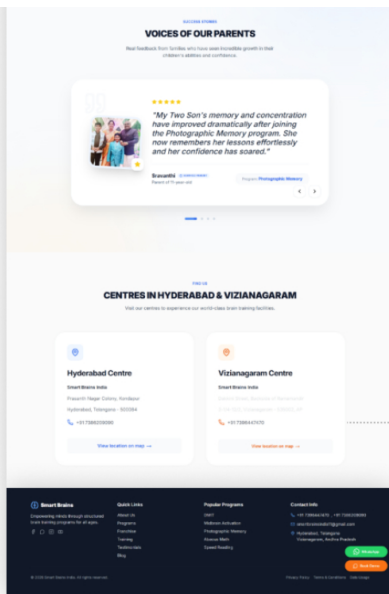

Why choose us — icon grid — Objection handler
6 benefit tiles with icons. Answers 'why you?' before it's asked.

Extraordinary results gallery — Social proof wall
A dense Video mosaic of student achievements with labelled milestones. Mass volume of evidence hard to scroll past without believing it.

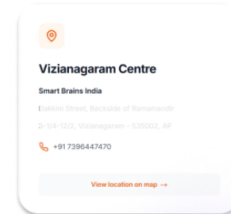

Parent voice testimonials — **Peer validation**

Star-rated quote cards from real parents with photo, name, and program tag. Carousel format keeps it compact, the exact words worried parents need to read.

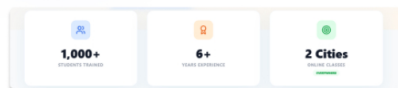

Centre locator — Physical trust

Two-column card with full addresses, phone numbers, and a "View Location on Map" link. Proves you're real, local, and reachable.

ABOUT PAGE

Humanized the academy — founder story, mission, and the "why" behind these programs. Designed to create emotional connection before the parent makes contact. Credibility signals and story were balanced carefully to avoid feeling boastful.

Program-specific FAQ accordion

What age group do you train?

We work with children aged 5 to 15 years. Our programs are designed to match each child's developmental stage — younger children (5–8) focus on foundational brain stimulation, while older children (9–15) work on advanced memory, speed, and academic performance techniques.

How long is one program / batch?

Smart Brains India is a leading provider of brain training programs for children and adults. Our programs are designed to improve cognitive function, memory, and learning ability through personalized training techniques.

Certifications:

- Certified Trainer
- Midbrain Activation Specialist

Based on the pattern and accompanying guidelines with your child.

Smart Brains India is a leading provider of brain training programs for children and adults. Our programs are designed to improve cognitive function, memory, and learning ability through personalized training techniques.

Certifications:

- Certified Brain Training Expert
- Speed Reading Specialist

Based by students do for high energy and engaging content.

Smart Brains India is a leading provider of brain training programs for children and adults. Our programs are designed to improve cognitive function, memory, and learning ability through personalized training techniques.

Certifications:

- Program Management
- Support Teacher

Designed to help parents with scheduling and support.

Our Teaching Philosophy

Whole Brain Development

We focus on stimulating both the left and right hemispheres of the brain to unlock full cognitive potential.

Traditional Montessori Science

A unique combination of ancient wisdom (like Vedic Math) and modern neuroscience (like Montessori) for holistic growth.

Stress-Free Learning

Our classes are designed to be fun, interactive, and pressure-free. We don't just teach, we ignite curiosity and joy.

Child-Centric Approach

Building confidence is our priority. Every child program is their own choice in a supportive and encouraging environment.

Our Learning Environment

Take a glimpse into our vibrant classrooms and see how we create engaging, fun-filled learning experiences for every child.

What Makes Us Different

We go beyond traditional tutoring to holistic brain development.

Proven Results

Scientifically designed programs that show measurable improvements in focus, memory, and learning ability.

Personalized Attention

Every child receives individual guidance based on their unique learning style and needs.

Updated Teaching Methods

Our programs evolve continuously based on the latest research and child development practices.

Strong Parent Partnership

We work closely with parents to support children both inside and outside the classroom.

Midbrain Activation

Activate Your Child's Third Eye — Enhance Imagination, Memory & Genius Learning

Midbrain Activation — also known as Gandharva Vidya and the Power of Intuition Program — is a scientifically designed 2-day workshop that stimulates the midbrain (mesencephalon), the bridge between your child's left and right brain. When activated, children develop the ability to read, sense, and perceive with eyes closed, while dramatically improving concentration, memory, creativity and academic confidence.

DISCOVER THE SCIENCE

WHAT IS MIDBRAIN ACTIVATION?

The midbrain (mesencephalon) is a small but powerful region of the brain that acts as the relay centre for visual, auditory and motor information. As children grow up, the brain naturally becomes more lateralised — relying more on one side — resulting in enhanced potential.

Midbrain Activation reverses this trend by using specialised music, brain gym exercises, meditation and sensory activities to bring the brain into an optimal alpha-theta wave state, where both hemispheres work together at full capacity.

The Gandharvi Vidyā Connection

In the Mahabharata, Queen Gandharvi referred to herself as 'lateralised' herself for life and developed extraordinary perception beyond the physical age — what we call the "third eye" or sixth sense. The expert wisdom in the cultural root of our program, Bharata's brain science with tradition and innovation called it Gandharvi Vidyā. Both arose at the same truth: every child already has this ability inside them.

IMPORTANT SAFETY NOTE

This is a 100% safe, evidence-backed program. There are no religious rituals, magic, or supernatural claims. All activities are conducted by trained facilitators in a controlled, child-friendly environment. Detailed activities are explained at all times.

Key Benefits

- ✓ Laser-sharp focus and extended concentration spans
- ✓ Significantly improved academic performance and memory retention
- ✓ Enhanced emotional balance and self-confidence
- ✓ Creative problem-solving and out-of-the-box thinking
- ✓ Heightened intuition and sensory awareness
- ✓ Boosted creativity, storytelling and imagination

Certificate Ceremony & Parent Counselling

Follow Up Session

✓

Check online 2 weeks, 2-3 days, then practice for 10 days

Expected Results

- Immediate visible improvement in sensory activities by end of Day 1
- Child can accurately read texts and identify objects with eyes closed
- Measurably longer attention spans confirmed by parents within 30 days
- Sustained growth in academic performance via regular practice

CAN YOUR BRAIN SENSE THE HIDDEN CARD?

5 cards are placed face down. One hides a secret symbol. Close your eyes, breathe, and trust your intuition. This is exactly what children experience in the Midbrain Activation workshop — except they do it skillfully.

BRING THE CHALLENGE

In the end workshop, invited children identify colours, numbers and objects with closed eyes — a small challenge to how seen in the below.

SUCCESS STORIES

VOICES OF OUR PARENTS

Real feedback from families who have seen incredible growth in their children's intuition and focus.

Priya Sharma

Parent, Bangalore, 10th Nov 2024

★★★★★

"I was skeptical at first — honestly I thought it sounded too good to be true. But seeing my daughter read and calculate at an age beyond her years was a game-changer. More than the ability itself, the confidence she built up. She's a completely different child now."

Shruti Sharma

Parent, Mumbai, 12th Dec 2024

★★★★★

"We worried for the online batch since our daughter is shy. The facilitator was extremely professional and we saw real-time progress throughout. The online sessions kept the program going, his memory for the personal details improved and he's now excited about studying."

Ashish Reddy

Parent, Hyderabad, 15th Nov 2024

★★★★★

"My daughter was extremely shy and would never participate in class. After the Midbrain Activation program, she started coming to work, answering questions confidently, and even won a storytelling competition at school. The transformation was unbelievable — thank you Shree Brain!"

GET QUESTIONS?

FREQUENTLY ASKED QUESTIONS

Everything you need to know about the workshop and enrollment process.

What exactly is Midbrain Activation / Gandharvi Vidyā?

Is this safe? Are there any religious or supernatural elements?

My child is young. Are they eligible?

Are parents allowed inside the workshop?

What happens after the 2-day workshop? Will the results last?

Is the online batch as effective as the offline workshop?

What is the fee and what does it include?

07 — LEARNINGS

WHAT THIS PROJECT TAUGHT ME

- Designing for a family business means balancing emotional investment with objective UX decisions — a skill I had to actively build throughout this project.
- Shipping a full product alone sharpened my ability to prioritize ruthlessly. Every design decision had to earn its place because I was also the one building it.
- SEO and UX aren't separate disciplines — the best-performing pages were the ones where information architecture, content, and technical SEO aligned completely.
- Using AI as a coding collaborator accelerated development without compromising the design intent. Knowing how to direct AI tools effectively is itself a valuable skill.
- Real results validate design choices better than any usability test. Seeing multi-city client inquiries come in confirmed that the strategy was right.
